Introduction and Learning Outcomes

The goal of this assignment is to practice with logarithms that appear frequently in the analysis of algorithms.

Recall that $\log_a n$ is the power to which you need to raise a in order to obtain n.

The main rules for working with logarithms are the following:

1. $\log_a(n^k) = k \log_a n$
2. $\log_a(nm) = \log_a n + \log_a m$
3. $n^{\log_a b} = b^{\log_a n}$
4. $\log_a n \cdot \log_b a = \log_b n$

Is it true that $(\log_5 n)^2 = 2 \log_5 n$?

- Yes
- No

Correct

$(\log_5 n)^2$ is just $(\log_5 n)(\log_5 n)$

---

1 / 1 points

2.

$\log_2 n \cdot \log_3 2 = \log_3 n$

Yes

Correct

No

3.

$n^{\log_2 n} = n$

Yes

No

Correct

1 / 1 points

4.

$\log_3(2n) = \log_3 2 \cdot \log_3 n$

Yes

No

Correct

1 / 1 points

5.

$\log_{10}(n^2) = 2\log_{10} n$

Yes

Correct

Practice Quiz, 6 questions

No

1 / 1 points

6.

$n^{\log_7 3} = 7^{\log_3 n}$

Yes

No

Correct

$n^{\log_7 3} = 3^{\log_7 n}$
